Introduction

When the Doge meme coin launched in 2013, most crypto lovers termed it a crazy idea that would quickly fade away. Proving everyone wrong, Dogecoin created flutters across the crypto world to become one of top four crypto coins based on market value. The Doge ecosystem is continuing to evolve. Now, it is the time for DogePay to disrupt the crypto world by bringing crypto wealth to the common man.

DogePay takes its inspiration from Father Doge in standing out of the crowd while giving back all the love and support shown by the community. DogePay offers an easy way to earn passive income, giving away endless USDT. Operating on the Binance Smart Chain, DogePay delivers higher transaction speeds at lower costs. With 37% of coins burnt, DogePay offers higher rewards to its members. Most importantly, DogePay is cute, adorable and captivating.

Abstract

World's Best Rewarding Coin

DogePay captivates everyone with its charm and cuteness but when it comes to performance, DogePay knocks down other coins with its highly rewarding income model, delivering more passive income to its members.

The Arrival of Passive Income

The highly-deflationary token model makes it rarer over time which means members wealth keeps increasing over time.

DogePay Swap

The DogePay Roadmap includes a live decentralized DogePay swap on the website.

DogePay Wallet

Check out your transactions, earnings, rewards, coin valuation and wallet balance with ease by signing into the DogePay Wallet.

Fun Unlimited

Along with rewards, DogePay continues to deliver fun and entertainment for the crypto meme lovers.

DogePay Core Values

Transparency

Transparency is one of the most appealing aspects of blockchain technology that offers a fully auditable transaction ledger. DogePay is a decentralized crypto coin that highly values transparency, allowing anyone to join and view transactions.

Sustainability

DogePay tokenomics model is designed by crypto industry experts with longevity and exponential revenue growth in mind. With auto and manual burns, members can leverage the rarity of coins over time to gain more.

Community

Community support is the biggest strength of DogePay and we value our members with the highest regard. With multiple Telegram channels and community forums, DogePay keeps all the members across the globe connected.

Security

While Dogepay offers transparency, security is not compromised. DogePay takes the highest measures to ensure that the entire DogePay ecosystem is secure and safe.

The Technology behind DogePay

Binance Smart Chain (BSC)

The advent of the Ethereum smart contract-enabled blockchain has revolutionized the dApp development space. While this programmable blockchain allowed developers to perform a

variety of financial transactions and create innovative code, the slow transaction speed and the high gas fees became a big concern over time. To overcome this challenge, Binance Exchange introduced Binance Smart Chain (BSC) in April 2020.

Binance Smart Chain (BSC) is an independent chain but is compatible with the Binance blockchain and runs in parallel with BC. It uses the Proof of Staked Authority (PoSA) consensus model to validate transactions on the chain.

Advantages of Binance Smart Chain

➢ **Higher Transaction Speeds**: Binance Smart Chain is designed to deliver higher transaction speeds and it lives to that expectations. It offers lower latency, high-speed transactions and a larger capacity to develop dApps. BSC transactions are typically 3-4 times faster compared to Ethereum.

➢ **Higher Interoperability**: With Ethereum Virtual Machine (EVM) features incorporated into the chain, BSC enables developers to run, configure and migrate Ethereum-based apps to BSC. It means higher interoperability.

➢ **Low Transaction Fees**: BSC offers low transaction fees that encourages user participation. The gas fees on BSC is 20 times lower in comparison to Ethereum.

➢ **Highly Secure**: BSC is a proprietary blockchain that is highly secure. The PoSA consensus model with 21 validators ensures decentralization, trust, transparency and community involvement.

DogePay Ecosystem

World's Best Reward Coin

Earn endless USDT with DogePay. 5% of each transaction is redistributed to token holders, paid in USDT. 10% of each sale is redistributed to token holders, paid in USDT. This means higher rewards for holders. 30% of burnt supply means less supply and highest distribution of rewards.

DogePay's Community

DogePay's strength lies in its vibrant community. We are active on Telegram and Twitter. With meme fun and rewards mixed together, DogePay is already building up a large community that is connected, active, expressive and supportive.

Locked Liquidity

The majority of initial LP tokens were locked and burned.

To view LP Holders:

lances

DogePay Protocol

The DogePay ecosystem runs on the Binance Smart Chain. As such, all transactions are performed at higher speeds and with lower costs.

5% - 5% of each transaction is added to Liquidity

10% - 10% of each sale is redistributed to token holders, paid in USDT

5% - We have burnt 30% of total supply.

DogePay Roadmap Board

Phase 1 – Arrival

- ➢ Marketing to disseminate opportunity
- ➢ Website publication
- ➢ 5,000 Telegram subscribers
- ➢ DogePay is born!

Phase 2 – Barking

- ➢ Influencer Marketing Press
- ➢ Listing on CoinMarketCap
- ➢ Listing on CoinGecko
- ➢ 25,000 Telegram subscribers
- ➢ 25,000 holders

- ➤ Third-party audit
- ➤ Purposeful donation

Phase 3 – Strolling

- ➤ 100,000 holders
- ➤ 100,000 Telegram subscribers
- ➤ AirDrop
- ➤ Large influencer marketing press
- ➤ Lottery for holders
- ➤ Full integration of software

Phase 4 – Sprint

- ➤ 150,000 holders
- ➤ 150,000 Telegram subscribers
- ➤ Explosion marketing
- ➤ DogePay Swap
- ➤ Add more memes
- ➤ Dashboard expansion

Phase 5 – Jump To The Moon

- ➤ 300,000 holders
- ➤ Release NFT marketplace and collection
- ➤ Give away Tesla to promote the campaign
- ➤ Memes omnipresent
- ➤ $250K donation to animal shelter at $500M market cap
- ➤ $500K donation at $1B market cap
- ➤ Bridge more chains
